T6-AC3 Table Boxes

NEW
Cable Exit Brush
option shown

T6 Black / Aluminum

Shown with round cover and IPS Plates.

T6 Brass

Shown with square cover and IPS Plates.

DESCRIPTION

Our new T6-AC3 Table Box is a larger version of our popular T3-AC2/PC1 series. A versatile connector cavity comes with three integral AC outlets to handle most table-top power requirements, and it's isolated from the low voltage sections. Should your installations require more AC outlets, you can add a bracket to expand the unit to a 6-outlet model.

In the low voltage sections, you can populate using a large variety of IPS insert plates, or select the cable-pull or snap-in connector brackets.

Features of this elegant addition to your conference table include: a multi-tiered, plate-stacking arrangement and overall depth adjustment; the cover can be closed while in use with cables exiting through the milled openings; your choice of AC power cords or hardwired versions; round or square covers; and finishes include black anodized, clear anodized, or brushed brass. Covers with brush seals to protect against dust and debris are available (see image above).

Mounting is simply drilling a 6" round hole, dropping the unit in, and installing the mounting hardware. Whether you select a round or square cover, the mounting hole is always round.

The T6-AC3 can be ordered in a variety of configurations to suit the requirements of the user. Use the chart on the back of this sheet to simplify the ordering process. First, determine the connector layout for the application. Then select the appropriate table box style and the desired large and small section brackets. Complete the design with any of the large selection of FSR's IPS components (see lit 1150).

APPLICATIONS

- Desks
- Lecterns
- Lab Tables
- Boardroom Tables
- Control Consoles
- Classrooms

FEATURES

- Round or Square Covers
- Easy décor blending with choice of Black, Aluminum or Custom Brushed Brass top
- Can be mounted in a wide variety of tables with thicknesses ranging from .75" to 2.25".
- Connector plates can be populated to match the application and customer needs
- Can be reconfigured at any time as requirements change.
- Deep interior compartment accommodates longer/larger connector shells.
- Covers with cable entry brush seal option available
